HOW SMOOT GANG

has acquired some specific information about the ingratitude of senatorial districts. Mr. Walton is the only Republican who has been able to carry the First senatorial district, which comprises Rich, Morgan and Davis counties. He is the tio present senator and has had an ambition to be re-elected to that position, with the idea in mind of adding the position of president of the state senate to the other honors he has honestly won during an active and honorable life. All along there has been practically no opposition to his renomination. That is, apparently no opposition. Mr. Walton has ever had the habit of doing his own thinking and it is an open secret that he has little sympathy with the political methods of the men who control Republican politics in Utah for their own financial advantage. Also, Mr. Walton has been no sure bet for Smoot for senator. He has been more than pleased to sustain him as anostle at the pleased to sustain him as apostle at the regular conferences of the church, but there has been some doubt as to Mr. Walton's sympathy with Smoot's political ambitions. Hence the woe for Mr. Walton in this year of stress for Smoot. Shortly before the senatorial convention was held in Farmington on Wednesday, it developed that Mr. Walton was not satisfactory to the federal machine. A satisfactory to the federal machine. A man who would stay put was wanted. Moroni Heiner, a Morgan county man, had been endorsed by his county, but he also was not up to the requirements. First of all, E. P. In the convention, Rich county had

five votes, all pledged to Walton, and faithful to him to the end. Morgan county had six votes, all for Heiner from beginning to end. Davis county had six-teen votes. Of these two were for Wal-ton and one. Joel Parrish of Centerville, was instructed by his primary to vote for Heiner, the Morgan candidate. With a total of twenty-seven votes in the con-vention, it was impossible for a man with only thirteen votes—all remaining in Davis county if the pledges and instructions held-to secure the nomination. This was the situation of any Davis county candi-However, Parrish never voted for Heiner, not even a complimentary ballot did he cast for the man in accordance with the definite instructions given him. It was said after the convention that James Eldredge of the Davis stake presidency was instrumental in influencing Parrish to drop Heiner and so break faith with the men who had sent him to the convention. Three ballots were required. On the final ballot Walton received seven votes, Heiner six and Burton fourteen, a

come? The increase in the number of office holders is likewise enormous. The Republicans attempt to excuse their unparalleled appropriations by saying that new work is being undertaken; but this is not a sufficient answer. The appropriations in the army and navy alone show an increase of one hundred and twenty million dollars a year over the appropriations of eleven years ago. What excuse can be given for the trebling of the appropriations for army and navy? No nation is unfriendly to the United States; no internal causes justify the increase. The principle of monopoly of the talking that competition is hurtful. In taking this position it supports the main contention of the Socialists. Mr. Taft, the Republican candidate, in the speech announcing his candidacy, advocated such amendment of the anti-trust law as would make it apply only to unreasonable restraint of trade. This idea that reasonable restraint of trade is unobjectionable is the entering wedge—it is the first step towards the annihilation of the principles of competition. ples of competition.

Democratic Position Stated.

"The Democratic party has been called a Socialistic party and I have been denounced as a Socialist. I contend that the Republican party, not the Democratic party, is aiding the socialistic party; and this is evidenced from the fact that Socialist leaders prefer Republican success to Democratic success. They fear the Democratic reforms will retard Socialism, and they believe that Republican abuses can be used to arouse opposition to the entire competitive system. The Democratic party believes that the Socialist is honest, but mistaken. The Democratic party would argue with the Socialist, while the Republican party denounces him; but the Democratic party denounces him; but the Democratic party would remove the spirit of unrest and discontent by eliminating the abuses that are the foundation of unrest and discontent.

Appeal to the People.

"We appeal to the sober sense of the American people and ask that they join us in the inauguration of reforms which will restore the government to its old foundations and win for the government the love of all the people by making it the protector of every class and the friend of every legitimate interest and enterprise."

But you'd better wait and see. Maybe something will happen tomorrow."

The Pacific Express company said there was no moose head with them from Spanish Fork or elsewhere. The Wells-Fargo people said they had no consignments from Spanish Fork at all.

So if the moose head is in town it very to home look as though and the farmhouse Ernest told distance.

Arriving at the farmhouse Ernest told his father that there was an animal so strange of appearance in the field, such a one as he had never seen, nor yet heard one as he had never seen, nor yet heard of the state, and who is said to know as much about nature and as little anything like any of the animals that roamed the Williams domain. consignment for ne from Spanish Fork including the moose head. I don't really

think that a man could, under ordinary circumstances, inflict a fatal wound on a moose with one discharge of a shotgun.

A wother question now arises: If Mr. Williams killed the moose is he not viopricked up its ears, or rather its horns, and stood at attention and then at defiance.

The dog, whose name unfortunately was not learned, was the bolder, and made the first offer of combat. The stranger, which hereafter will be known as the moose, accepted the challenge and made a sally. Interested in his work of annihilating the dog, the moose came within close range of Mr. Williams' trusty gun. The trusty gun responded to the touch of the trigger and a pound or so of leaden pellets went sailing into that moose's hide. It is told that the shots entered the heart, so good was Mr. Williams' aim; quent the marshy and forest districts, and they give him credit for great speed in running. "He is found from Maine to British Columbia," says one authority.

Why Is a Moose?

Last, but by far the most perplexing problem of all, is the inquiry: How did the moose get to Spanish Fork? Was he not appreciate the value of the moose's head, for they mutilated it badly. The informant was informed, however, that there was little doubt that the taxidermist could "fix that ail right."

"Save the Antlers."

The next step in the tragedy which ended in the moose being bereft of life, was a long distance telephone call to E. Mehesy, jr., the Salt Lake furrier, notifying him that there had been consigned by express a moose head, with the request that he mount the head, and "for heaven's sake, save the antlers."

"As I had never heard of a moose in Utah, much less seen one, except with a circus, I was doubtful about the whole "Therefore, why is a moose?"

Myer to an undertaker's, where it will
remain until the arrival of the young
officer's father, who wired today from
San Francisco that he would like to
have his son buried in either Arlington
or West Point cemetery. The funeral
arrangements have not been made, but

Mr. Sensenbrenner and wood pulp were
to be admitted free of duty.

Official Inquiry.

Major George O. Squier, acting chief signal officer of the army, this morning west, figured it out that it was entirely possible for a moose to make his way from the Yellowstone park along the range of mountains to the east of Salt Lake, and thus find himself one day a newcomer in the rich pastures of the Spanish Fork section. Wallace and Lieutenant Frank P. Lahm were the other members present. Lieutenant Sweet of the navy and Lieutenand Richard Creecy of the marine corps, detailed to Fort Myer aeronautical tests, assisted the board in its work.

The wreckage of the aeroplane had been placed in the aeroplane shed last night, and the members of the board, accompanied by Octave Chanute Professor Albert Zahm of the Catholic Taking of Testimony in Contempt university, both of whom are authorities on aeronautics, inspected the tan-

This caused the blade to break. The other blade of the propeller flew around and in turn struck the same wire, breaking it. This made Mr. Wright lose control of the planes. Shutting off power to stop the remaining propeller, which tended to swing the machine in a circular direction toward the left, he steadied the machine somewhat, but the distance to the ground was not great enough to restore the equilibrium." Mr. Sensenbrenner presented figures showing that since 1879 the price of print paper has decreased from about 7 to less than 2 cents per pound. Average prices for each year since 1879 were presented and the price per hundred pounds ranged from \$1.21 to \$1.69, the price reached in 1897, and the lowest at which print paper has ever been sold in this country.

The witness explained that the cause of the decrease in the price of print paper was the installation of larger and faster running machines. GOMPERS WOULD NOT REPLY

Case Closed for the Time Being.

Washington, Sept. 18 .- The taking of testimony in the contempt proceedings against Messrs. Gompers, Mitchell and Morrison, officers of the Federation of Labor, came suddenly to a temporary close today. Mr. Davenport sought to question Mr. Gompers concerning editorials printed in the special number of the Federationist, and on advice of counsel Mr. Gompers refused to answer because the utterances had been made since the filing of the contempt petition. A number of questions bearing upon this issue were put to the witness, and it was agreed that they should be certified to Judge Gould to determine whether they were relevant. It is probable that they will be pre-

sented to the court on Monday. The first of Mr. Davenport's questions put to Mr. Gompers today related to the effect of the editorial printed in the Federationist for January, 1908, but the witness contended in reply to the interrogatories that the article could not have had the effect of inciting its readers to violate the terms of Judge fould's injunction decree.
